EDUCATION

Babu Banarasi Das Institute Of Technology And Management
Bachelor of Technology in Computer Science

Aug 2025
Current GPA: 7.1/10.0

SKILLS

Languages: C/C++, Python, JavaScript/TypeScript, HTML/CSS, Node.js

Tools: Git/GitHub, VS Code, IntelliJ IDEA, Atom

Frameworks: React.js, Tailwind CSS, Bootstrap

Database: MongoDB/Mongoose, SQL

PROJECTS

Crypto Info | *React.js, Axios, Chart.js, CoinGecko API, Git, VS Code* (View Project)

- Built a React app that displays real-time prices of various cryptocurrencies.
- Utilized the Axios library to make API calls to a crypto data provider API, which returns the current prices of selected cryptocurrencies.
- Implemented the React-Chartjs-2 library to visually display the data in a line chart, making it easy for users to track price movements.
- Designed the app to be responsive and usable on any device.

Meme Generator | *React.js, CSS3, JavaScript, Git, VS Code* (View Project)

- Designed and implemented the user interface with React, ensuring a smooth and intuitive experience.
- Integrated real-time text editing and drag-and-drop functionality for enhanced usability.
- Developed the download feature, allowing users to save customized memes in multiple formats.
- Optimized for desktop and mobile devices, ensuring a seamless user experience across all screen sizes.

AI Chat-Bot | *React.js, Google Generative AI, CSS3, Git, VS Code* (View Project)

- Designed and developed a responsive front-end interface using React Js.
- Connected external APIs to fetch dynamic celestial data and implemented error handling for robust performance.
- Improved rendering speed and user interaction by optimizing state management and API calls.
- Created detailed and interactive visualizations of data, enabling users to easily interpret complex information.

Weather Web App | *HTML5, CSS3, JavaScript, Fetch API, Git, VS Code* (View Project)

- Fetches and displays current weather details such as temperature, humidity, wind speed, and conditions using an API.
- Allows users to search for weather information by entering city names.
- Ensures compatibility and usability across all devices, including desktops, tablets, and smartphones.

EXPERIENCE

Web Development Intern | *Lets Grow More* Dec 2023 – Jan 2024

- Designed a static landing page website using HTML, CSS and JavaScript, making it completely responsive on all devices.
- Created a React application using API to fetch data and display it on a webpage, ensuring complete responsiveness on all devices.
- Built a system to manage student records and results, featuring a secure login system for administrators to perform tasks such as creating and editing student results. The system was built using HTML, CSS, and PHP, with a MySQL database storing all student data.

ACHIEVEMENTS

- Certified in **Google Cloud** through Google Cloud Career Practitioners Campaign organized by GDSC BBDITM.
